ABOUT

Zachariah Peterson is a well-known **researcher and electronics designer**. In 2017, he founded **Northwest Engineering Solutions** as a technology consultancy and has since grown the company into an innovative design and manufacturing house for advanced electronic products.

Zachariah works with the biggest brands in **PCB design software and simulation**, as well as innovative **PCB manufacturers**, bringing **technological insights and foresight** to their product development and digital marketing strategies. His goal is to help his clients remain competitive and show technical leadership in a quickly evolving technological landscape.
